Claims 1-5 are pending in this application.

### DETAILED ACTION

1 This action is responsive to the application filed on 10/15/2003.

2 Claims 1-5 are allowed.

### STATEMENT OF REASONS FOR ALLOWANCE

3 The following is an examiner's statement of reasons for allowance:

Grava et al. (US 5,023,007) teaches a refrigerant composition comprising a fluorine-containing hydrocarbon and a cyclic compound having a formula (I) which is similar to the compound of the claimed formula (II), when in the reference's formula (I), R is a hydrogen atom, x is an oxygen atom and y is a CH<sub>2</sub> radical (see abstract). However, patentee differs from applicant in that Grava et al does not teach or suggest the use of oxygenated or non-oxygenated lubricants in the refrigerant composition as required in the instant claims. Grava et al, also does not teach or suggest a method comprising the steps of replacing a refrigerant composition comprising a chlorofluorocarbon and/or hydrochlorofluorocarbon and non-oxygenated lubricant with a second refrigerant composition comprising fluorocarbon compounds, oxygenated lubricant and compatibilizers of lactone compounds wherein the method comprises the step of leaving the non-oxygenated lubricant in the system as claimed. Accordingly, the claimed subject matter as a whole would not have been obvious to one having ordinary skill in the art of refrigerant formulations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
